

CORNER FEED, FILTER PRESS PLATES, REQUIRE PRECISE MANUFACTURING OF THE FILTER CLOTH FEED NECK, OR THE USE OF A RUBBER NECK, TO ENSURE THAT THE SLURRY DELIVERY INTO THE CHAMBER IS NOT BLOCKED BY EXCESS MATERIAL. ANY REDUCTION IN THE FEED CAPABILITY CAN RESULT IN DIFFERENTIAL PRESSURE AND PLATE DAMAGE.

THE FOLLOWING MEASUREMENTS ARE SPECIFICALLY REQUIRED TO MANUFACTURE CLOTHS CORRECTLY FOR THIS FILTER PRESS PLATE DESIGN.

**MICRONICS FILTER CLOTH WITH RUBBER NECK FEED**

**POLYPROPYLENE FILTER PLATE**
