

## NFM® BLUE-FLEXX™ HIGH-PERFORMANCE BELT PRESS FABRIC

### Key Features and Benefits:

- Superior sludge release, allowing for easier belt washing and longer belt life
- Increased belt diagonal flexibility for improved belt stability, helping to prevent the wrinkles that lead to premature belt failure
- Interlocking weft yarns provide for increased belt structural integrity
- Improved abrasion resistance
- 3% Greater Break Strength vs. other heavy-duty fabrics on the market
- Longer run-time with our high-performance belt press fabric for:
  - Less downtime
  - Fewer resources required to replace failed or worn-out belts
  - Lower operating costs

The Blue-Flexx™ design provides increased belt structural integrity due to the fabric's interlocking weft yarn strands

Old design has straight weft strands

### Repair Services

We provide field belt installation and repair services. Our experts will install your new belt or repair your existing belt, safely and on-time.

Through our family of trusted brands, Cleanova Micronics provides the industry's best Total Engineered Filtration Solutions, helping our customers maximize performance and lower cost-of-ownership.
