

# Filter Press Cloth

## For Optimizing Your Mine's Filtration Operations

Micronics expertly designs and manufactures high-quality Filter Press Cloth for Your Demanding Mining and Mineral Processing Operations

- Filtering of Abrasive Slurries
- Mine Tailings Management Solutions
- Dewatering Mineral Concentrates
- Merrill-Crowe Process

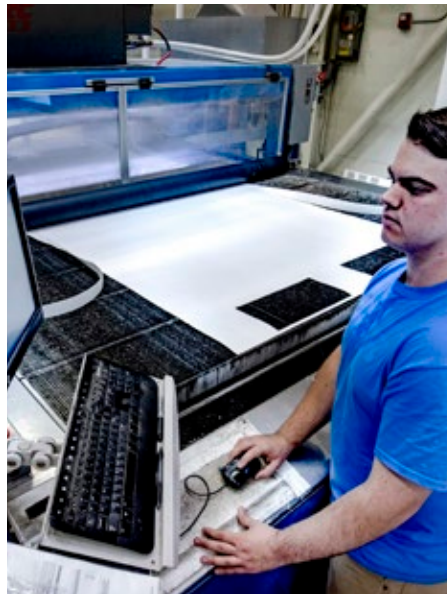

Filtration Expertise with: Au, Ag, Cu, Zn, Ni, Li, Iron Ore, Rare Earths, Alumina

We Engineer our Filter Press Cloth to Deliver Optimum Results and Exceed Your Expectations.

**Worldwide State-of-the-Art Filter Media Manufacturing Facilities for Liquid Filtration**

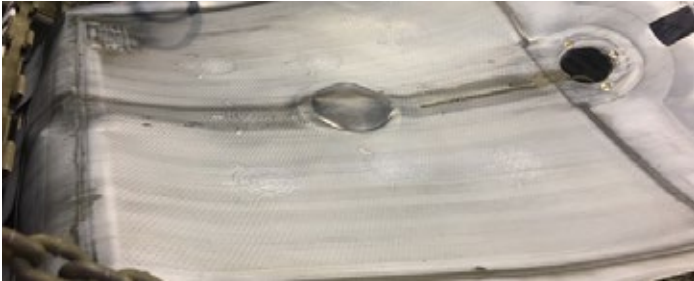

Chattanooga, TN, USA | Winthrop, ME, USA | Trois-Rivières, Quebec, Canada  
Indaial, Santa Catarina, Brazil | Saltillo, Mexico | Jiangsu, China

**Best Global Capabilities, Quality, Turnaround, Performance, And Applications Expertise.  
Micronics Delivers.**

## Accept No Substitute.

- ✓ Abrasion-resistant for highly-abrasive mining slurries
- ✓ Suitable for high-velocity slurries
- ✓ Good cake release, low cake moisture & clear filtrate
- ✓ Easy and fast to change-out
- ✓ Longer cloth life
- ✓ Options for minimizing leakage

### Benefit from our

- High-Quality Manufacturing
- Precision Laser-Cutting
- Welded HPR™ Feednecks
- Edge Sealing
- Sewing Expertise

### We'll Help You With The Most Effective Filter Cloth Solution for Your Mining Press Operation

- MINE-XLL™ Filter Cloth for Extra-long life (Heavyweight Nylon)
- Felted Polypropylene Cloth
- Woven Polypropylene Mono/Mono Cloth
- Woven Polypropylene Mono/Multi Cloth
- Woven Polypropylene Multi/Multi Cloth
- LASTA MC Filter Press Cloth
- SOLAFT® PrimaPress™

**Micronics Filter Press Cloth Solutions Help to Improve Your Operation's Efficiencies, Filtration Equipment Uptime, and Environmental Protection.**

Ask Us About Our Industry-Leading Technical Field Service, Slurry Testing, and Process Optimization.

The Micronics Engineered Filtration Group is a leader in Pressure and Vacuum Filtration Solutions for the Mining and Mineral Processing industries.

From expert Mine Tailings Management Solutions to Dewatering Mineral Concentrate Slurries, you can count on the global Micronics team for Total Engineered Filtration Solutions.

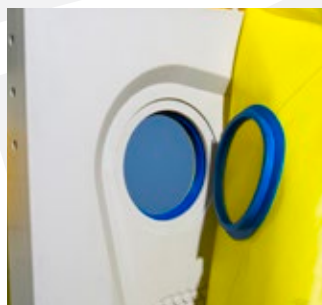

Our mission is to consistently deliver filtration expertise & innovative problem-solving that will help you improve your mine's operating efficiencies, reduce costs, increase uptime, and ensure environmental compliance. With the Micronics Engineered Filtration Group, you get the best filter media, filtration equipment, services, and spare parts all from one company.
