

SOLAFT® PrimaPress™ filters – now proudly part of Micronics' global in-house manufactured filter media offerings - are a range of trusted, reliable and highly-durable filters that deliver superior wet filtration performance and which surpass industry standards.

As with all other Micronics products, SOLAFT® PrimaPress™ filters are designed and crafted using premium materials and cutting-edge fabrication equipment, delivering exceptional durability and performance for demanding operating conditions.

Whether with minimizing cake moisture levels or achieving precise filtration performance, SOLAFT® PrimaPress™ filters are engineered to deliver optimum results.

ADVANTAGES & BENEFITS

- Longer cloth life
- Greater productivity due to lower maintenance needs
- Creating right balance between filter press cake % solids and % moisture
- Lower maintenance costs due to fewer cloth changeouts

FEATURES & OPTIONS

FABRIC OPTIONS

Available in Monofilament, Multifilament, or Mono-Multi combinations

DESIGN

Single and multi-layer

SURFACE / CAKE RELEASE

Quick and optimal cake release

WOVEN MEDIA

Plain, Twill, Satin & 2-layer weave

FILTRATE CLARITY / CAKE DRYNESS

Optimal cake moisture levels, according to customer requirements
