

FILTRATION SOLUTIONS FOR THE STEEL INDUSTRY

You can trust the Micronics Engineered Filtration Group and its leading brands – CPE, NFM, UPC, SFM, and Filterfab - to meet your steel facility's **Air Pollution Control (APC)** needs. For nearly 50 years, we have been an industry leader, supplying filter bags and field services to ensure your EAF, LMF, Blast Furnace, and Roof Evacuation baghouses are running optimally and meeting environmental regulations without excursions.

When it comes to **steel wastewater**, Micronics is your expert, reliable source for dewatering systems, whether it is in treating wastewater from the cold rolling process that contains oily waste and metallic particles, or from an electrogalvanizing line with zinc hydroxide.

Micronics is your Trusted Single Source for Pressure Filtration, Vacuum Filtration, and Air/Baghouse Filtration Solutions. We are ready for the steel industry's infrastructure investments!

- Industry-leading Filter Bags
- Filter Press Cloth for All OEM Presses
- Wastewater Filter Presses up to 2000mm+
